File size is the source file on disk. **WebP steps served** is the responsive ladder built from it — a visitor downloads one step, picked from their viewport, not the source. So the 2.51 MB why-imgImage22.png arrives as a 29.6 KB WebP at 360 w, and the 4.65 MB panty-liner-vs-pad.png cover as 10.3 KB. Images with “—” have no ladder: SVG (vector, resolution-free), logos, icons and the MP4 clips.

Pages not listed render no bitmap at all — **Periods Wall, Partner, Affiliate, Thara and Privacy** draw their art entirely as inline SVG. Totals per page count each distinct file once; the same asset appears on several pages (the nav mark, footer logo and product shots are shared), so page totals sum to more than the 52.82 MB of unique source weight.
